# How to reset your MyKarbon password

If you know your current password and would like to change it, this is the correct guide for you. If you have forgotten your password and would like to reset it, please see [our guide for recovering your account via forgotten password](#).

1) Log in to your account

2) Click “My Settings”

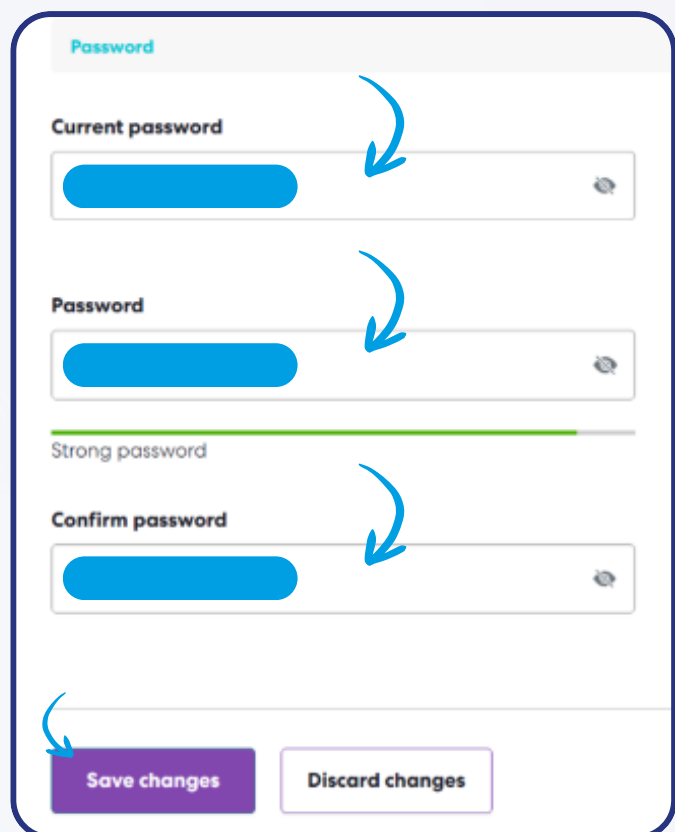

3) Scroll down until you see “Password”

4) Enter your current password

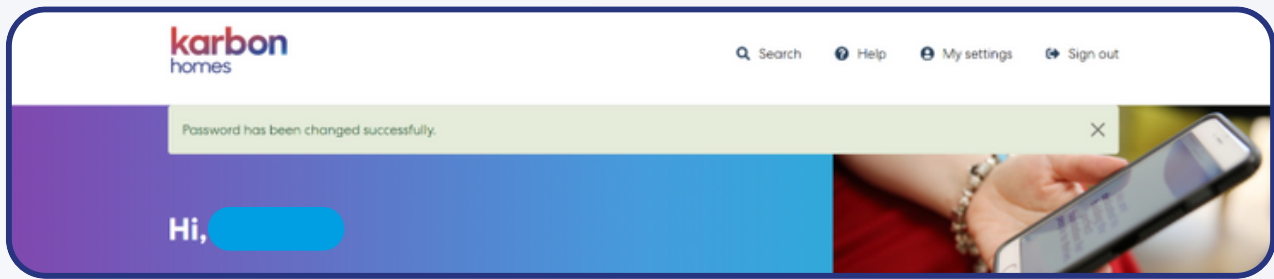

5) Enter your new password into “Password”

6) Type your new password again into “Confirm Password”

7) Click “Save Changes”

A screenshot of the 'Password' settings form. The form has a title 'Password' in green. It contains three input fields: 'Current password', 'Password', and 'Confirm password'. Each field has a blue arrow pointing to it. Below the 'Password' field is a green progress bar and the text 'Strong password'. At the bottom of the form are two buttons: 'Save changes' (purple) and 'Discard changes' (white). A blue arrow points to the 'Save changes' button.

8) Your password should now be changed
